EAVES & SOFFITS

Barestone External – Ceminseal Wallboard – Eaves Lining Sheets
Edge Cladding – Soffitline – Surround
## Barestone™ External
Cemintel Barestone™ prefinished panels provide a raw, contemporary finish for ceiling applications.

## CeminSeal® Wallboard
CeminSeal® Wallboard is a superior wet area internal lining. It uses Cemintel’s unique CeminSeal® water block technology, repelling water and increasing paint adhesion.

The smooth finish means less work for fixing and setting and provides an extremely smooth paint surface.

## Eaves Lining Sheet®
Specifically designed for use in the lining of residential eaves.

## Edge Cladding®
Edge Cladding is a pre-primed cladding, with sharp grooves, allowing for a creative pairing with the whole Cemintel range.

## SoftitLine®
Cemintel Softitline® is a durable product that can be used for external soffit and ceiling applications where a flush joint appearance is required. The panels incorporate Cemintel’s unique CeminSeal® water block technology, repelling water and increasing paint adhesion.

## Surround™
With a core range of expertly curated neutral colours and discrete patterns, the Cemintel Surround™ range is prefinished with sophisticated tactile surfaces, metallic finishes and subtle shades of marl, blue, grey and green.
